Experience

Klaviyo | Senior Product Designer

May 2021 - Present

Partner daily with Product and Engineering across three teams to define strategy in a high-impact product area used by over 150,000 customers.

Enable easier, faster, and more personalized content creation for email and mobile messaging, driving a ~40% conversion lift for customers:

- Designed a no-code message personalization UI, markedly increasing dynamic variable usage and reducing related support tickets by 5%.
- Delivered highly requested features for the email editor, including support for videos, reviews, and custom HTML.
- Introduced functionality for agency partners to showcase templates in our library, achieving 73% engagement and an increase in publish rate.
- Developed a library of pre-built, easy-to-use content for templates.

Design and launch editors for emerging mobile channels, including WhatsApp and RCS.

Built and continue to maintain an area-specific design system, modernizing cross-channel content editors with accessible, unified components. Facilitate adoption of the library across teams, resulting in a consistent UI and codebase.

Created custom onboarding workflows for key product areas (e.g., Web Forms, SMS setup), leading to a 20% increase in signup-to-create rates and a 15% increase in signup-to-publish rates.

Enhanced the 2-way Conversations Inbox with new features, doubling product usage by improving usability and functionality.

Mentor two junior designers through the team's design mentorship program.

Deloitte Consulting | UX Designer and Front-End Developer

February 2019 - May 2021

Designed an analytics dashboard for the marketing team of a multinational biotechnology company.

Designed and developed a platform for manufacturers to monitor supply chain data and auto-separate issues in a proactive and user-centric way.

Designed a product and created a design system for a multinational pharmaceutical company to optimize pharmacovigilance case processing.

Charles River Analytics | Front-End Engineering Intern

June - September 2018

Designed and implemented new features for a desktop application for architecture that aids the integration of air force missions systems.
